iTroll OS4 Software Update Information

We only need the CONTROL HEAD of your iTroll to do the OS4 software update!
Leave iTroll's POWER MODULE (box that connects to battery) installed in your boat.

Note: For weatherproofing purposes, the data cable is NOT detachable at the control head!
Follow the data cable back to the power module or optional extension cable to unplug it.

We are performing this upgrade at no charge other than the owner pays $10.00 for return
freight (please enclose check).
